(All figures are in SAR mln)

- Net financing recorded a modest +1% increase Q/Q, reaching SAR 104.3 bln while deposits showed a comparable growth, totaling SAR 114.5 bln, in line with our estimates. Both loan and deposit growth has decelerated Q/Q compared to the significant sequential growth seen in 4Q2023. Simple Loan-to-Deposit Ratio increased to 91% from 88% in the previous quarter, with an addition of SAR 1.0 bln in loans and SAR 0.8 bln in deposits.
- Net financing and investment income grew by a decent +4% Q/Q to SAR 1.08 bln. The increase was mainly driven by +16% Q/Q rise in the net income from investing, coupled with a smaller 0.4% increase in net financing income. Despite a 3% increase in yields leading to a modest 0.4% rise in net financing income, the higher 5% increase in cost of funds significantly impacted the overall growth. Additionally, the Cost-to-Income ratio has improved to 36% from 38% last year, reflecting a 210-bps reduction, despite +3% Y/Y higher operating expenses.
- NIMs marginally improved by 10 bps Q/Q settling at 3.28%. Non-core income increased by +9% Q/Q to SAR 324 mln, driven by gains on FVSI instruments, other operating income and higher in exchange income.
- Net income of SAR 671 mln is up +14% Y/Y and +4% Q/Q, in line with our estimate of SAR 653 mln. Bottomline growth was supported by a +5% Q/Q rise in total operating income, driven by an increase in net income from investing and financing activities. The stock trades close to our SAR 37.00 target. Hence, we maintain a Neutral stance.
